About Us

Tan T P Consultants Pte Ltd is a local-based Licensed and Professional Electrical Engineering company with a long history in the provision of professional services to many well-established and prestigious companies. We are highly experienced in a vast number of industries, ranging from residential to industrial and commercial buildings.

Tan T P Consultants Pte Ltd is managed by Experienced Licensed Professional Electrical Engineers with substantial knowledge, expertise, and industry experience in **High Voltage (HV) and Low Voltage (LV) Systems** in the building services industry. With a strong educational background that is backed up by substantial industry experience, Tan T P Consultants Pte Ltd strives to execute all projects with a high dedication to excellence, professionalism, and precision.

Our growth and success over the years is directly attributed to our highly knowledgeable and well experienced professional team of staff. With many years of vigorous education and industry experience in electrical engineering, we have built a reputation for quality work and value-added engineering. We stand for the highest level of dedication and precision, in tandem with our commitment to safety concern, cost efficiency, and timely completion of project schedules.

Our Services

We will undertake Audits & Surveys and provide ongoing advice and support. We will review your existing procedures to develop Safe Systems of Work, Electrical Safety Rules and HV & LV switching procedures. We will audit your operational procedures to assess and appoint suitable authorised & competent persons to manage the risks on site.

We aim to offer a client-focused approach in our provision of a **Safe** work system, place of work and plant & equipment.
